Changing the TU Color Scheme

If you don't like the bright TU green, you can also use a less bright green by modifying:

- `beamercolorthemeTuDortmundBeamer.sty`

Replace the default dark green color with TU-branded option by commenting/uncommenting:

Default Dark Green (CalPolyGreen)

```
\setbeamercolor{title}{bg=CalPolyGreen,fg=white}
\setbeamercolor{frametitle}{bg=CalPolyGreen,fg=white}
```

TU Green / 80% (tugreen80)

```
%\setbeamercolor{title}{bg=tugreen80,fg=white}
%\setbeamercolor{frametitle}{bg=tugreen80,fg=white}
```
